

ENSURING SAFE DISTRIBUTION FROM LOADING TO DELIVERY

**nimbus
solutions**

CONSUMER & COMMODITY GOODS

Streamline distribution. Enhance security. Ensure compliance.

Delays, theft, and inefficiencies in the Consumer and Commodity Goods Sector can significantly impact your distribution processes and bottom line. Nimbus Solutions offers a comprehensive **Platform-as-a-Solution (PaaS)** designed to optimise the movement of goods, vehicles, and personnel throughout your distribution network.

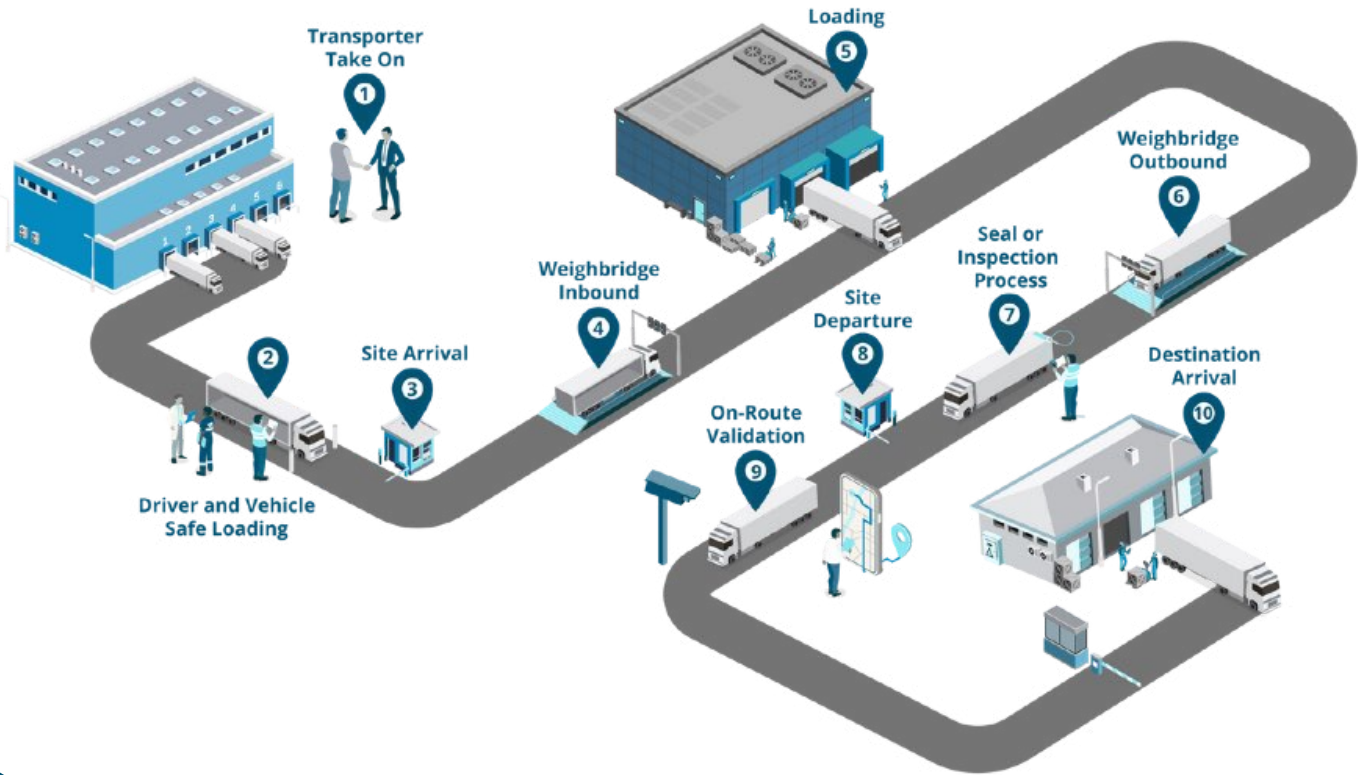

From vehicle access to delivery, our platform integrates seamlessly with Radio-frequency identification (RFID) readers, weighbridges, and automated boom gates, providing you with full visibility and control over every stage of the distribution process.

Ensure secure, compliant, and efficient distribution with Nimbus, gain full control over vehicle access, delivery schedules, and seal management for seamless operations.

COVERING YOU ACROSS THE OPERATIONAL LIFECYCLE

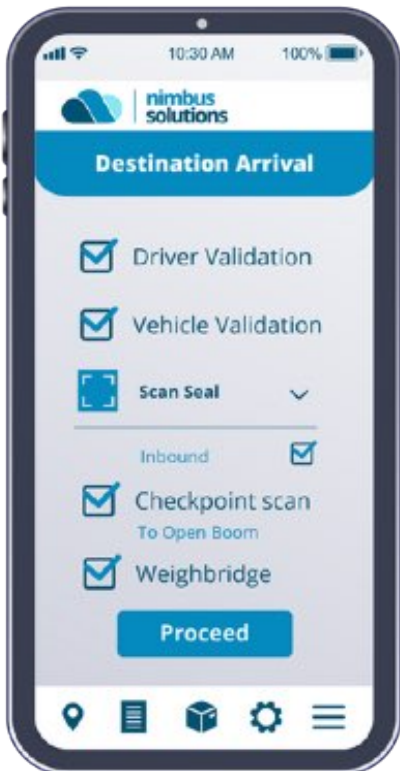

Enhance safety and ensure regulatory compliance with Nimbus Solutions across your Commodity or Consumer Goods Operational lifecycle. We simplify complex processes, keeping your operations smooth and secure.

Key features include:

Vehicle and truck access scheduling	<ul style="list-style-type: none"> Automates vehicle scheduling and access, preventing bottlenecks at distribution points. Pre-scheduled access ensures timely pick-ups and deliveries, optimising resource use and reducing downtime.
Cycle duration tracking	<ul style="list-style-type: none"> Monitors travel times from manufacturing facilities to distribution points, ensuring on-time deliveries. Early detection of delays allows for rapid response, improving supply chain reliability.
Seal management	<ul style="list-style-type: none"> Tracks and validates container seals, preventing tampering and ensuring that commodities are securely transported.
Weighbridge integration	<ul style="list-style-type: none"> Integrates with weighbridges to automatically capture accurate weight data, ensuring compliance with regulatory requirements and reducing manual errors.
Transporter take-on and safe loading procedures	<ul style="list-style-type: none"> Enforces compliance with governance and safety protocols during loading, reducing the risk of accidents and ensuring that vehicles meet safety standards before departure.
Real-time monitoring and route validation	<ul style="list-style-type: none"> Provides real-time tracking of vehicle routes and delivery schedules, ensuring that all deliveries are on time and aligned with your distribution goals.

Your Commodity and Consumer Goods Operations benefits from:

- **Operational efficiency:** Automate vehicle access and scheduling to reduce wait times and optimise the movement of goods through your distribution chain.
- **Enhanced security:** Real-time seal management and automated vehicle validation help prevent theft and ensure the secure delivery of goods.
- **Compliance and safety:** Built-in safety checks and regulatory compliance features protect your goods and employees, ensuring adherence to industry standards.
- **Cost optimisation:** Real-time data insights allow for better decision-making, reducing costs associated with delays, inefficiencies, and non-compliance.

Nimbus Solutions empowers Consumer and Commodity Goods companies to streamline their distribution networks, ensuring secure, efficient, and compliant delivery. With our integrated platform, you gain full control over your distribution processes, helping you achieve greater reliability and profitability.
